IMCO Technologies and Insight Health Solutions Partner

IMCO Technologies and Insight Health Solutions partner to Integrate IMCO-STAT CTRM and RadiologyInsight Peer Review in Pilot Accounts.

Pewaukee, WI, and East Providence, RI (December 10, 2010)—[IMCO Technologies \(IMCO\)](#), the provider of IMCO-STAT Critical Test Results Management (CTRM) software and [Insight Health Solutions \(Insight\)](#), the provider of RadiologyInsight peer review management (RadiologyInsight) software, have agreed to a partnership to develop pilot sites for the integration of IMCO-STAT CTRM and RadiologyInsight. The focus for IMCO and Insight is an integrated solution that will **benefit physicians by providing ease of use, workflow efficiency, and improved patient care.**

IMCO-STAT CTRM utilizes a flexible software design to tailor a CTRM solution for the workflow of each customer facility. Using IMCO-STAT CTRM will save radiologists time, ensure fast delivery and acceptance of alerts by physicians, and provide result tracking, management reports. The new user interface ensures easy system navigation and the visually intuitive dashboard provides continuous, at-a-glance alert status updates.

RadiologyInsight Peer Review is a fully automated system designed to streamline the peer review process required by the American College of Radiology (ACR). Combining Insight's flexible technology and quality expertise, RadiologyInsight provides a statistically valid peer review system that assigns overreads to qualified physicians by subspecialty to ensure compliance with regulatory standards and integration into the performance evaluation and reappointment process.

Both companies are focused on providing user-friendly systems to improve workflow efficiency for radiologists.

About IMCO Technologies

IMCO Technologies develops, sells, and services software solutions for information processing and management to hospitals, medical centers, radiology groups, and orthopedic practices. Product development centers on the principles of (1) ease of use, (2) workflow process efficiency, (3) fast, closed loop communication, and (4) affordability.
